Projects

AICTE Task Management Application ([Link](#))

In the problem statement, AICTE states that every year AICTE has to process more than 6-crores of documents manually. There was a need for an Android application to store the data and also automate various processes. We have developed an Android application for the same.

- Designed and developed scalable and customer-facing APIs for seamless user experience,
- Implemented microservice architecture using Java, Spring Boot and MySQL. Contributed as a backend developer to develop backend API.

IR Remote Controlled Home Automation

An Arduino-Uno Microcontroller-based project to control home appliances with the help of an IR remote.

- Home appliances connected to the device can be turned ON/OFF by pressing the buttons of the IR remote.
- Appliance status is displayed on the LCD panel.
